

Technical Papers P

Technical Reports and Publications

The following published technical information is available in pdf form on this site.

Title
Description

A brief history of pozzolans, PFA and cement
A brief outline of the historical use of pozzolans, PFA and cement.

The importance of reducing residual carbon in fly ash used in concrete
Brief overview of work investigating the effect of residual carbon in fly ash for use in concrete.

The future specification of cement type, class and water/cement ratio: part 1.

© The Concrete Society - Reproduced from 'CONCRETE' magazine with permission of The Concrete Society

Introduction, water and Portland cement. The first in a series of three articles dealing with cements containing approved secondary main constituents.

The future specification of cement type, class and water/cement ratio: part 2.

© The Concrete Society - Reproduced from 'CONCRETE' magazine with permission of The Concrete Society

Durability considerations for cements containing approved secondary main constituents and additions.

The future specification of cement type, class and water/cement ratio: part 3.

© The Concrete Society - Reproduced from 'CONCRETE' magazine with permission of The Concrete Society

Evaluation of cement constituents and principal conclusions.

A matrix method for the evaluation of Alpha
Optimizing usage of Alpha.
